PREFACE.

"THE SONG OF PRAISE is an act of devotion, so becoming, delightful, and excellent, that we find it coeval with the sense of Deity ; authorised by the example of all nations, and almost universally received into the solemnities of public worship. The book of Psalms, as the name itself imports, was adapted to the voice of song.—And the authors of those invaluable Odes well knew the sweetness, dignity and animation that were hereby added to the sacred service of the temple. With what raptures do they describe its effects ; with what fervor do they call upon their fellow worshippers to join in this delightful duty : *It is a good thing to give thanks unto the Lord, and to sing praises unto thy name, O Thou most High. Praise ye the Lord ; for it is good to sing praises unto our God.*

Divine Song is the language of nature. It originates from our frame and constitution. Do lofty contemplation, elevated joy, and fervor of affection, give beauty and dignity to language, and associate with the charms of Poetry ? By a kindred law which the Creator hath established, they also pleasingly unite with the strains of sweet and solemn HARMONY.

Music suitably expresses the sentiments of devotion, and the sublime delight which religion is calculated to inspire. Joy is the natural effect of Praise ; and song the proper accompaniment of joy. Singing is not only a general indication of delight, but expressive also of the prevailing sentiments and passions of the mind. It can accommodate itself to the various modifications of love and gratitude, the essence of a devotional temper. It hath lofty strains for the sublimity of admiration, and plaintive accents, which become the tear of penitence and sorrow. It can adopt the humble plea of supplication, or swell the bolder notes of thanksgiving and triumph.

Music not only expresses, but powerfully *excites* and *improves* the devout affections. It is the prerogative of this noble art, to cheer and invigorate the mind ; to still the tumultuous passions ; to calm the troubled thoughts, and fix the wandering attention. But its energy is never so conspicuous, so delightful, as when consecrated to the service of religion ; as when employed in the Courts of JEHOVAH."

If such is the happy tendency of well regulated song in the house of God, it must be highly important to have our Church music accompanied with its proper effect. This can be accomplished only in two ways ; by having *good music* ; and by having it *well performed*. With regard to the former, several of our late publications furnish us with a rich variety. To attain the latter, the *art of singing* must be cultivated. An exercise so pleasing and attractive seems only to want regulation and method. How practicable and easy would improvement become, if the more respectable members of a society would, by giving it their patronage and countenance, encourage the younger part to be instructed in the principles of Psalmody ? Under a prudent plan, and steady support, a reasonable hope might be indulged that the attempt would be followed with success, and thereby make the PRAISE OF GOD TO BE GLORIOUS.

ADVERTISEMENT.

In the compilation of this work great care has been taken to select such music only, as will be found on trial to be of permanent use in the services of the Church. The tunes are taken from authors of well known eminence, and for the most part, have already been approved by men of judgment and taste.

In style they are (generally) *simple, dignified, and pathetic*; but sufficiently varied, it is believed, to meet the wishes of different societies and musical choirs.

All light and flimsy airs, which debase the subject to which they are set, and can be recommended for little more than novelty, have been cautiously excluded. That kind of music, which has no tendency to exalt the mind, and excite devotional feelings, is altogether unsuitable for the temple of the Most High.

In the selection and arrangement of the music, and general inspection of the work, the publisher has had the assistance of several gentlemen, who have spared no pains to render it worthy of public patronage: and who were desirous of having comprised, in a moderate compass, a number of standard tunes for the use of the church and society in this place.

The exertions, which of late have been made in this, and several neighboring States to improve the musical taste of our country, are duly estimated, and have a claim to the thanks of the community.

WE the Subscribers have perused "The Hallowell Collection of Sacred Music," and most cheerfully recommend it as a volume containing a rich variety of excellent tunes, judiciously selected and arranged; well calculated to improve the musical taste of our country and aid the devotional exercises of our Churches.

A Dictionary of Musical Terms.

ADAGIO, (*or Ado.*) slow.

Ad Libitum, at pleasure.

Affettuoso, tenderly.

A. Tempo, in strict time.

Allegretto, a little brisk.

Allegro, (*or Allo.*) brisk.

Allegro ma non troppo, brisk, but not too fast.

Amoroso, nearly the same as Affettuoso,

Andante, distinct, exact.

Andantino, very exact and slow.

Anthem, a portion of Scripture set to music.

Canon, a regular and exact fugue, in either the unison, fifth, or eighth. In these pieces one singer begins alone, and when he comes either to the end of his part, or to a repeat, (if written on one staff,) a second begins, then a third in like manner, and so of the rest.

Crescendo, a gradual increase of the sound.

Chorus, full, all the voices.

Da Capo, begin again and end with the first part.

Diminuendo, a gradual diminution of the sound.

Dolce, sweetly, tenderly.

Duet, *Duetto* or *Duo*, a piece with two parts, either vocal or instrumental.

Finale, the last movement of a musical piece.

Fine, denotes the end of any movement.

Forte, (*or For.*) loud.

Fortissimo, (*or F. F.*) very loud.

Fuga or *Fugue*, a piece in which one or more parts lead, and the rest follow in regular intervals.

Grave, the slowest time.

Largo, *Lentemente*, or *Lento*, very slow.

Larghetto, not so slow as *Largo*.

Legato, slurred, a style in singing in opposition to *Stoccatto*.

Mesoso, slow, firm, and bold.

Moderato, moderately.

Mezzo, moderately rather, as *Mezzo Forte*, moderately loud, *Mezzo Piano*, rather soft.

Organo, (*or Org.*) the Organ part.

Piano, (*or Pia.*) soft.

Pianissimo, (*or P. P.*) very soft.

Presto, quick.

Prestissimo, very quick.

Pomposo, in a grand or pompous manner.

Recitative, kind of musical recitation between speaking and singing.

Rondeau, a piece of music in which the first part is repeated.

Siciliano, a slow, graceful movement in Compound Time.

Solo, for a single voice or instrument, *Spiritoso*, or *Con Spirito*, with spirit.

Stoccatto, very distinct and pointed.

Sotto Voce, middling strength of voice.

Symphony, a passage for instruments.

Thorough Bass, the instrumental Bass, with figures for the Organ.

Vivace, with life and spirit.

Volti Subito, turn over quickly.

DISTRICT OF MAINE.

BE IT REMEMBERED, that on the sixteenth day of October, A. D. 1817, in the forty-second year of the independence of the United States of America, EZEKIEL GOOBALD, of the District of Maine, hath deposited in this office the title of a book, the right whereof he claims as Proprietor, in the words following:—viz “The HALLOWELL COLLECTION of Sacred Music; adapted to the different Subjects and Metres, commonly used in Churches.” In conformity to the Act of the Congress of the United States, entitled “An Act for the encouragement of Learning, by securing the copies of Maps, Charts, and Books, to the Authors and Proprietors of such Copies, during the times therein mentioned.” And also, to “An Act, entitled An Act supplementary to An Act, entitled An Act for the encouragement of Learning, by securing the Copies of Maps, Charts, and Books to the Authors and Proprietors of such Copies, during the times therein mentioned, and extending the benifits to the arts of Designing, Engraving, and Etching Historical and other Prints.”

Evidiments of Music.

MUSIC consists in a succession of pleasing sounds, with reference to a peculiar and internal sense implanted in us by the great Creator. As a science, it teaches us the just disposition and true relation of these sounds; as an art, it enables us to express them with facility and advantage.

Music naturally divides itself into *Melody* and *Harmony*. *Melody* is the agreeable effect arising from the succession of single sounds. *Harmony*, the pleasing union of several sounds at the same time. The *Air* is the spirit and style of Melody. The principal distinctions of musical sound are *Time* and *Tune*; to the happy combination of these two qualities, is chiefly to be ascribed the pleasing and endless variety of the musical art.

Five lines drawn over each other form a *Staff*. On this *Staff* or *Support* the notes and characters of music are written.

The lines and spaces are counted upwards. Every line or space is called a *Degree*; therefore the Staff includes nine degrees. Two more degrees are gained by using the spaces above and below the Staff. If more notes are required, short lines are added, called *Ledger* lines; and thus the degrees are increased at pleasure.

The notes of the Diatonic or Natural Scale of Music are seven, whose distances or degrees are measured by tones and semi or half tones. The seven first letters of the alphabet are applied to the notes, in the following order, A, B, C, D, E, F, G; when there is occasion for an eighth letter, the first is repeated. These letters comprehend a system of degrees, called an Octave, from which proceeds the variety of harmony.

A

THE SCALE.

Treble and Tenor.

A musical staff with five solid horizontal lines and four open spaces. It begins with a treble clef and a common time signature. The notes are represented by solid black dots. Below the staff, the letters D, E, F, G, A, B, C, D, E, F, G, A, B, C are written under the corresponding note heads.

D E F G A B C D E F G A B C

Counter.

A musical staff with five solid horizontal lines and four open spaces. It begins with a treble clef and a common time signature. The notes are represented by solid black dots. Below the staff, the letters E, F, G, A, B, C, D, E, F, G, A, B, C, D are written under the corresponding note heads.

E F G A B C D E F G A B C D

Bass.

A musical staff with five solid horizontal lines and four open spaces. It begins with a bass clef and a common time signature. The notes are represented by solid black dots. Below the staff, the letters F, G, A, B, C, D, E, F, G, A, B, C, D are written under the corresponding note heads.

F G A B C D E F G A B C D

The F and G Clefs only are used in this Collection.

The Scale contains seven primitive or original sounds (every eighth being the same in nature as the first) of which five are whole tones, and two semi or half tones. The semi or half tones are between B and C, and between E and F.

In practising musical lessons, it is thought proper to appropriate peculiar syllables to the seven intervals in the Octave; in order that the same name applied to the same interval may naturally suggest its true relation and sound. The syllables made use of are four, fa, sol, la, mi. Mi, which occurs only once in the octave, is called the *Master note*, as it determines the situation of the rest in the following order :

Above *mi*, twice *fa*, *sol*, *la* ;
Below *mi*, twice *la*, *sol*, *fa*.

The semitones are between *mi* and *fa*, and *la* and *fa*. To find *mi*, observe the following direction.

In all tunes having no flat nor sharp at the beginning, *mi* is in *B*.

If <i>B</i> be flat, <i>mi</i> is in	E	If <i>F</i> be sharp, <i>mi</i> is in	F
If <i>B</i> and <i>E</i> be flat, <i>mi</i> is in	A	If <i>F</i> and <i>C</i> be sharp, <i>mi</i> is in	C
If <i>B</i> , <i>E</i> , and <i>A</i> be flat, <i>mi</i> is in D		If <i>F</i> , <i>C</i> , and <i>G</i> be sharp, <i>mi</i> is in G	
If <i>B</i> , <i>E</i> , <i>A</i> , & <i>D</i> be flat, <i>mi</i> is in G		If <i>F</i> , <i>C</i> , <i>G</i> , & <i>D</i> be sharp, <i>mi</i> is in D	

Figure, length, and relative value of notes, with their respective rests.

1 Semib. = 2 Minims = 4 Crotchets = 8 Quavers = 16 Semiquav. = 32 Demisem.

When a Rest occurs, the performer is to be silent during the length of the note to which it answers, whether semibreve, minim, crotchet, quaver, semiquaver, or demisemiquaver.

Explanation of Musical Characters:

A *Flat* ♭ set before a note sinks it half a tone.

A *Sharp* ♯ set before a note raises it half a tone.

When any number of Sharps or Flats are placed after the Cleff, at the beginning of the Staff, they affect all the Notes of the same letter in every Octave throughout the Movement, and are termed the *Signature*.

Those which occur in the course of the Movement, in addition to the others, are termed *accidental*, to distinguish them from those of the Signature, which are *essential* to the Scale of the original Key note.

The *accidental* Sharps and Flats only affect the Notes which they immediately precede, and those of the same letter which follow them in the same Measure; but, if one Measure ends, and the next begins with the same Note, the accidental Character which alters the first note, is understood to affect the second.

A *Natural* ♮ restores a note made flat or sharp to its original sound.

A *Slur* shews what notes are sung to one syllable.

The *Hold* directs that the sound of the note over which it is placed be continued longer than its usual length; and sometimes that a pause be made in the music in the nature of a rest.

The *Re-pea* signifies that a part of the tune must be sung again; and is placed at the beginning and end of the strain to be repeated.

The figure 3, over or under three notes directs that they must be performed in the time of two of the same kind.

directs that they must be performed in the time of two of the same kind.

Choosing Notes give the performer liberty to sing which he pleases.

The *Trill* shews that the note over which it is placed should be shaken.

Notes of *Transposition* and the *Appoggiaturas* are left to the explanation and direction of the well informed teacher.

The several graces of music are best learned by hearing them well performed.

One essential grace is a clear and distinct speaking of the words, according to the most polite way of pronunciation.

A *Dot* set after a note or rest adds one half to its original length.

A single *Bar* divides the time in music according to its measure note.

A *Double Bar* shews the end of a strain.

A *Brace* shews how many parts move together.

Staccato notes should be sung very distinctly.

A *Close* shews the end of a tune.

Ledger lines are added, when the notes go out of the compass of the common Staff.

Of Time.

Time is marked by three divisions or modes, viz. Common, Triple, and Compound. *Common Time* has four marks or modes, and is measured by even numbers, 2, 4, 8, &c.

First Mode. *Second Mode.*

Third Mode. *Fourth Mode.*

The first mode of Common Time has one semibreve, or other notes and rests equivalent, in a bar; the bar is performed in four seconds, two with the hand down and two with it up.

The second mode contains the same notes in a bar; the time measured in the same manner, but to be performed one-fourth faster.

The third mode also contains the same notes in a bar, but is performed two seconds to a bar, one with the hand down, and one with it up.

The fourth mode has a minim for its measure note; this or other notes equivalent, fill a bar; performed one-fourth faster than the third mode, and beat in the same manner.

Triple Time has three marks or modes, viz.

First Mode.

Second Mode.

Third Mode.

The first mode of Triple Time has three minims in each bar, each minim sounded in a second of time; the two first to be sung with the hand down, and the last with it up.

The second mode, three crotchets in a bar; the time measured as in the first mode, but one-fourth faster.

The third mode has three quavers in a bar; the time measured with the hand as before, but performed one-fourth faster than the second mode.

Compound Time has two marks or modes, as follows:—

First Mode.

Second Mode.

The first mode contains six crotchets in a bar; three sung with the hand down, three with it up, in the time of two seconds.

The second mode has six quavers in a bar; divided and sung in the same manner as crotchets in the above mode, but performed one-fourth faster.

The foregoing modes are all in present use. They are given as general principles, by which the learner is guided. The mathematical difference between each mode is omitted. The performing of music slower or faster, in the different modes, is left to directive terms, in general use, and to the judgment of the performer.

Accent is a very important part of Music, and inseparably connected with good pronunciation. It is properly an agreeable swell, or force of the voice. If the poetry be good and the music well adapted, the accent will fall on the first and third parts of the Measure, in Common Time; and on the first part of the Measure and lightly on the third part in Triple time. It sometimes happens, however, that the weak part of the Measure is made of more consequence than the strong; such a departure from the regular order is called *Emphasis*.

Most of the preceding rules should be committed to memory by the pupil, before he attempts to call the notes. And it ought to be enjoined on him by his Instructor to pay particular attention to the principles of Music.

When he has acquired a knowledge of the Rules he should attend to the Lessons for tuning the voice.

After he has become acquainted with the several intervals, plain tunes may be sung by note, and when well learnt, accompanied by the words.

Of Keys or Scales, and their two Modes, Major and Minor.

A Diatonic Scale, of which the Notes bear certain relations to one principal Note from which they are all, in some respects, derived,

and upon which they all depend, is termed a *Key*; and the principal Note is called the *Key Note*, or *Tonic*.

Every Scale in which the two Diatonic Semitones are found between the *third* and *fourth* Degreee, and between the *seventh* and *eighth* Degrees, ascending from the Tonic, is termed the *Major Mode* of that *Key*; because the Interval between the Tonic and its Third (or Mediant,) consists of two Tones; that is, of the greater Third. The only series of this mode among the natural Notes, is that which commences with C; and hence this Key must be taken as an example of all the Major Scales.

That series of the seven letters which begins and ends with C, ascending or descending, is most satisfactory to the ear.

Every Scale in which the two Diatonic Semitones are found between the *second* and *third* Degrees, and between the *fifth* and *sixth* Degrees, in ascending from the Tonic, is termed the *Minor Mode* of that Key; because the Interval between the Tonic and its Third (or Mediant,) consists only of one Tone and one Semitone, that is, of the lesser Third. The only series of this mode, among the natural Notes, is that which commences with A; and hence this Key may be taken as an example of all the Minor Scales.

The Natural, or Diatonic Scale, consists of five tones and two semitones; but every tone may be divided into two semitones by the use of flats and sharps.

By a comparison of the sounds C D E F with those of G A B C, we find their distances to be similar, consisting of two tones and a semitone; consequently a melody formed by one will be similar to that of the other.

These two *fourths* taken in succession without *Plats* or *Sharps*, form a *scale*, the chief sound of which is C, and therefore called the *Key Note*.

Take eight Notes from C, and the same number from D, and an entirely different melody will be produced.

The effect of these notes to the ear depends entirely upon the position of the semitones. The Musical Student should therefore obtain a thorough knowledge of their places in the Scale.

Now let another Fourth be formed similar to the *upper* one of C, by inserting a sharp on F, and thus having two tones and a semitone; and placed above it, at the distance of a tone: these two *Fourths* will then form a new Scale (G being the Key Note) exactly similar to C, but five degrees *higher*. As the Scale of G is made perfect by the Sharp on F only, F is called the *first Sharp*. And by forming another Fourth, in like manner, on the last Scale, C is called the *second Sharp*; G, the *third*, &c. In this way all the Major Scales with Sharps are constructed, viz: by inserting a Sharp on the Fourth of the former Scale, to make a new Sharp Seventh, or *leading note* to the next Scale. It thus appears that the series of Sharps ascends by *Fifths*, and descends by *Fourths*.

Again let another Fourth be formed similar to the *lower* one of C, by inserting a Flat on B, and thus having a semitone and two tones; and placed below it at the distance of a tone; these two *Fourths* will then form a new Scale (F being the Key Note) similar to C; but five degrees *lower*. As the Scale of F is completed by the Flat on B only, B is called the *first Flat*; and for the same reason E, the *second*, &c. In this way all the Major Scales with Flats are constructed, viz: by inserting a Flat on the seventh of the former Scale, which then becomes the Fourth of the next Scale. Hence it appears, that the series of Flats descend by *Fifths*, and ascend by *Fourths*.

The office then of Sharps and Flats is to give us other Keys besides C, or A. And this is effected by changing a tone into a semitone, or a semitone into a

tone, as occasion may require. They also serve to bring the music within the compass of the voice, or instrument; and regular limits of the Staff.

The following Table (in which the letters denoting the semitones are put nearer together than the rest,) will make the above remarks easily understood; and show in what manner the pitch of a tone, both in the *Major* and *Minor Mode*, may be changed, without altering the relative Intervals of their respective Scales.

In the Major Mode the usual Keys

are C	C	D	E F	G	A	B C	— Natural scale.
G	G	A	BC	D	E *FG	— F sharp.	
D	D	E	*FG	A	B *CD	— F and C sharp.	
A	A	B	*CD	E	*F *GA	— F, C and G sharp.	
E	E	*F	*GA	B	*C *DE	— F, C, G and D sharp.	
F	F	G	ABb	C	D EF	— B flat.	
B flat	B b	C	DEb	F	G ABB	— B and E flat.	
E flat	E b	F	GAb	Bb	C DEb	— B, E and A flat.	

In the Minor Mode the usual Keys

are A	A	BC	D	E F	G	A	— Natural scale.
D	D	EF	G	ABb	C	D	— B flat.
G	G	ABb	C	DEb	F	G	— B and E flat,
C	C	DEb	F	GAb	Bb	C	— B, E and A flat.
F	F	GAb	Bb	CDb	Eb	F	— B, E, A and D flat.
E	E	*FG	A	BC	D	E	— F sharp.
B	B	*CD	E	*FG	A	B	— F and C sharp.

It will be observed that, in the Major Mode, the *Mi* is always on the letter, next below the Key; and in the Minor Mode, on the letter, next above the Key. Also that Tunes in the Major Mode (or Sharp Key) may have Flats for their *Signature*; and Tunes in the Minor Mode (or Flat Key) may have sharps.

The Minor Mode requires that whenever the Seventh of the Scale (which is naturally a tone below it) ascends to the Eighth, it should become Sharp, as the *leading note* or *Sharp seventh* to the Key. The character denoting this change is always omitted in the *Signature*, and placed accidentally before the Seventh, which it is to elevate, whenever the melody requires its use. To avoid the harsh

Interval of the extreme Sharp second, between F natural and G sharp, the Sixth is also sharpened to accommodate the Seventh.

Thus the *accidental Scale* of the Minor Mode (ascending) is formed with two notes altered from the Signature, when necessary; but in the *descending Scale* the essential leading note is depressed to accommodate the Sixth.

The last note of the Bass is the Key Note; and from this the pitch of a Tune should always be taken.

That change which arises from the performance of the same Melody, in a higher, or lower pitch, is called *Transposition*. When, in the course of a Melody the Key Note is changed, and the original Scale altered, by the introduction of a new Sharp or Flat, such change is called *Modulation*.

"Those passages, where a modulation occurs by the introduction of accidental Flats or Sharps, and which appear difficult to learn by sol-fa-ing, are made easy by inverting the names of the notes along the cadence for which they are preparing, and calling them as in the Natural Key; that is when *fa* by sharps is raised a semitone (for two, three or more bars together) call it *mi*, and the notes above and below it accordingly; so when *mi* is a semitone lower by Flats, call it *fa*, and the notes above and below accordingly. By changing in this way the names of the notes agreeably to the modulated Key, the true sounds will be easily obtained."

The *Tonic*, or Key Note; the *Dominant*, or Fifth above the Key Note; the *Subdominant*, or Fifth below the Key Note, are the radical parts of every Scale, both Major and Minor. All Melodies are derived from these three principal Sounds, and wholly dependent upon them.

General Directions in respect to Singing.

In the choice of tunes let a particular regard be paid to the *subject* of the psalm or hymn. Different airs in music are suited to different sentiments and passions. When the sentiments and tune are at variance with each other, they aim at contrary passions; when in proper accordance, they mutually assist and animate each other.

Be careful to sing in just *Tune* and *Time*. Nothing more distinguishes the proficient in music than accuracy in both these respects.

Graceful singing is best learned by imitation and the instructions of a judicious master. Avoid a vulgar, inarticulate, and muttering pronunciation; a heavy, drawling, lifeless manner; or sudden bursts and explosions of sound. The tone should be clear, smooth, distinct and spirited.

It is of importance that each one should sing the part which best agrees with the tone and compass of his voice. Harsh, loud tones should be avoided; they preclude all delicacy of taste and expression, and render the performance disgusting. Whenever the performer indulges himself in the full stretch of his voice (which from ill timed *ambition* too often happens) the consequence is, that false *tones* are made, and the effect of the music destroyed.

The higher notes of the bass, and indeed of all the other parts, should be sung softer than the lower ones.

In sounds of considerable length begin with softness, increase in strength to the middle of the note, and then gradually diminish to the end.

 "EXPRESSION is the soul of good musical performance, and cannot be too earnestly recommended.

The want of it is the grand defect of public psalmody in general. The best psalm may be sung to the best tune, and every note, in the several parts, be sounded with the utmost exactness, and yet the performance have little interest or effect. *That performance of psalmody, and that only, is entitled to be called good, in which the movement, quantity, and tone of voice, are well adapted to the general subject, and so varied as justly to express the different thoughts, sentiments and passions.* This, it must be allowed, is an attainment of no small difficulty; and requires no small degree of judgment and taste, attention and practice.

If in singing schools, and in meetings for singing, a due proportion of the time were employed in singing psalms and hymns, with particular regard to *expression*, the exercise would be much more interesting as well as improving. Such a practice would serve to engage attention—to awaken thought and feeling—to cultivate judgment and taste—and to leave a favorable impression on the minds of the performers."

The two *Thirds*, Major and Minor are by far the most important of all the Diatonic Intervals, since the nature of the Mode entirely depends upon them; being called Major, when the Third is *greater*, and Minor, when the Third is *less*. These, and the Major and Minor *Sixths*, which are also important Intervals in the

Scale ought to be perfectly understood. In the Major Mode they contain one semitone more than in the Minor Mode. An Example is given underneath in which these Intervals in each mode are designated. Their different effect, when the notes are sung alternately, and in tune, will be readily perceived. These *leading notes* of the Scale should be made familiar to the learner, and occasionally repeated before a tune is sung, to assist him in making the true tones of the *Key*.

LESSONS FOR TUNING THE VOICE.

LESSON FIRST, in the Major Octave.

Bass. fa sol la fa sol la mi fa fa mi la sol fa la sol fa

SECOND LESSON.

A single measure of musical notation on a five-line staff. The key signature is A major (no sharps or flats). The time signature is 2/4. The measure begins with a quarter note followed by a series of eighth notes and sixteenth note pairs, creating a rhythmic pattern of eighth-note pairs and sixteenth-note pairs.

THIRD LESSON.

FOURTH LESSON.

A handwritten musical score for a string instrument, likely violin or cello, in common time (indicated by 'C') and G major (indicated by a 'G' with a sharp sign). The score consists of two systems of music. Each system begins with a dynamic instruction 'f' (fortissimo) and includes a first ending and a second ending. The notation uses standard musical symbols like quarter notes, eighth notes, sixteenth notes, and rests. The manuscript is written on five-line staff paper.

AIR. Great God, whose universal sway, The known and unknown worlds obey, Extend the kindom of thy Son, Till ev'ry land his laws shall own.

Musical notation for the Leeds tune, identical to the previous page, continuing the melody.

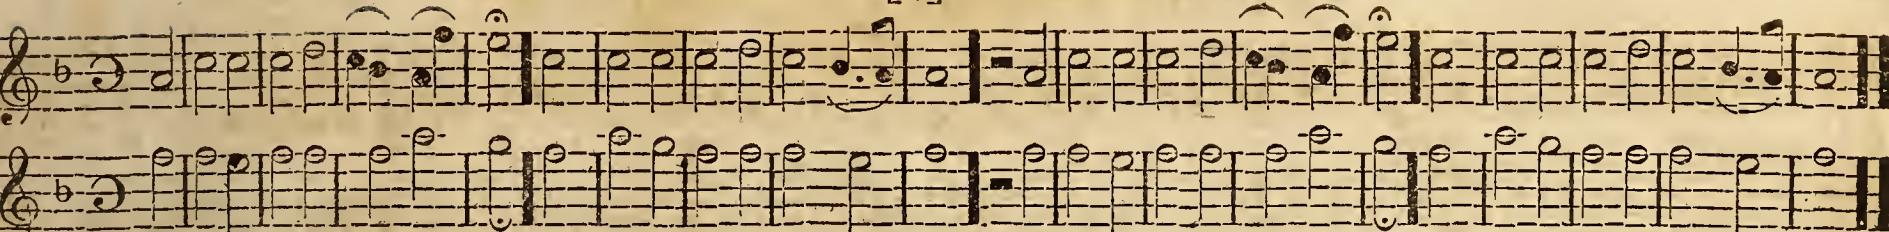

AIR. This spacious earth is all the Lord's, And men, and worms, and beasts, and birds, He rais'd the building on the seas, And gave it for their dwelling place.

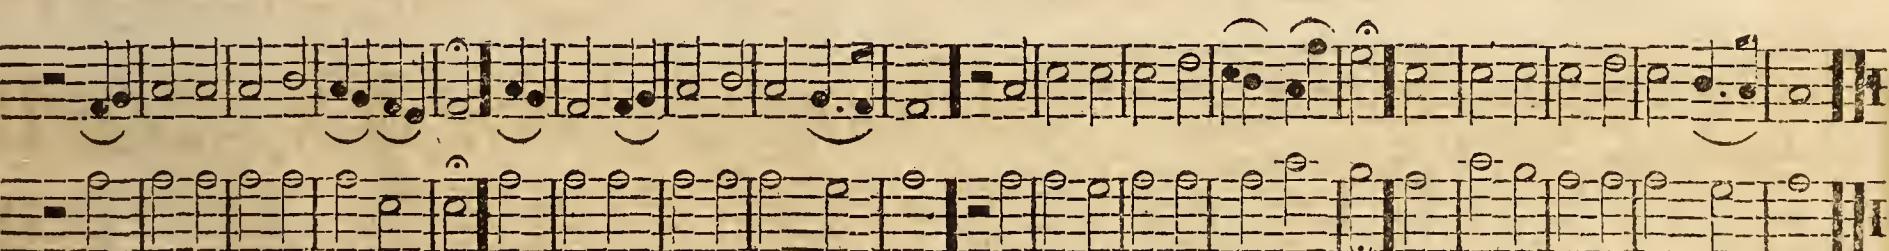

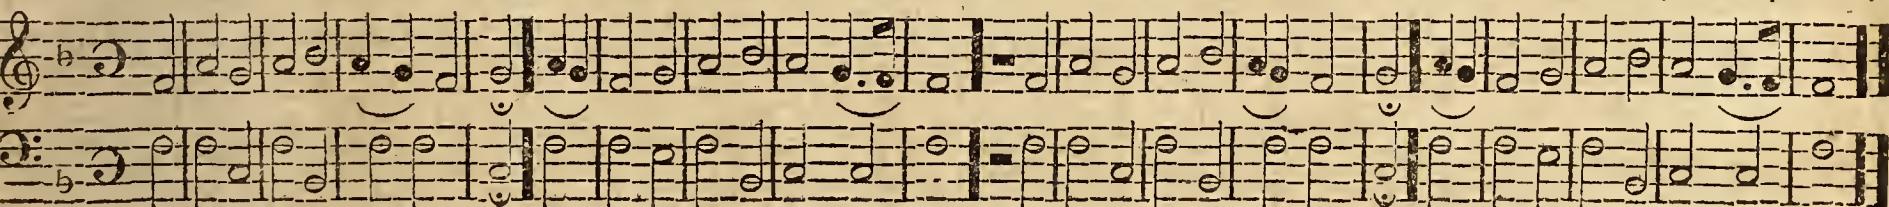

But there's a brighter world on high, Thy palace, Lord, above the sky; Who shall ascend that blest abode, And dwell before his maker God.

A.M. As the good shepherd gently leads His wandering flocks to verdant meads, Where peaceful rivers, soft and slow, Amidst the flowery landscapes flow;

So God, the guardian of our souls, Our wandering footsteps still controls. When lost in sin's perplexing maze, He leads us back to wisdom's ways.

Great God ! thy glories shall employ My holy fear, my humble joy ! My lips in songs of honor bring Their tribute to th' eternal King.

177

A musical score for a four-part chorus, likely for voices and organ. The score consists of four staves, each with a different vocal range and a basso continuo staff at the bottom. The vocal parts are: soprano (highest), alto, tenor, and bass (lowest). The basso continuo staff features a bassoon-like line with dots and dashes, and a keyboard line with dots and dashes. The music is in common time, with a key signature of one sharp (F#). The vocal parts sing a repetitive phrase: "O Lord, we trust alone in thee, alone in thee, alone in thee, we trust, O Lord, we trust alone in thee, alone in thee, alone in thee, we trust, O Lord, we trust alone in thee, alone in thee, alone in thee, we trust, O Lord, we trust alone in thee, alone in thee, alone in thee, we trust, in thee, O Lord; in thee, O Lord; O Lord we trust a - lone in thee." The vocal parts enter sequentially, starting with the soprano, followed by the alto, tenor, and bass. The basso continuo provides harmonic support throughout. The vocal parts sing a repetitive phrase: "O Lord, we trust alone in thee, alone in thee, alone in thee, we trust, O Lord, we trust alone in thee, alone in thee, alone in thee, we trust, O Lord, we trust alone in thee, alone in thee, alone in thee, we trust, O Lord, we trust alone in thee, alone in thee, alone in thee, we trust, in thee, O Lord; in thee, O Lord; O Lord we trust a - lone in thee."
