## PREFATORY NOTE.

---

The recently published Vol. XLVIII. of the German Handel Society contains, among other valuable works of the master, this Sonata for Viola da Gamba and Cembalo concertato in C major.

As Dr. Chrysander mentions in his preface, this sonata is the only work of this kind by Handel, which has hitherto been known. Its origin may be placed in the year 1705.

In introducing this interesting work, in a carefully revised edition, to the friends of the great master, I would call special attention to the beautiful, melodious Adagio, which forms the 3rd movement of the sonata.

GUSTAV JENSEN.
