LIBRO I^o

I^a PARTE

El fin de todo sistema de enseñanza es llegar por medio del estudio al más alto grado de perfección y para conseguirlo, es preciso allanar el camino que debe seguirse á fin de vencer las dificultades que se presenten. Una de las más grandes, es que los dedos adquieran agilidad, fuerza é independencia.

Para que los alumnos obtengan este resultado, nos proponemos presentar en esta obra una série de trabajos de mecanismo, todos ellos utilísimos que estudiados con constancia, harán que fácilmente puedan vencerse las dificultades que se presenten en los futuros estudios.

Del asiento y posición de las manos y de los dedos

El asiento (bien sea silla ó taburete) debe colocarse frente al centro del teclado, debiendo tener en cuenta al sentarse, que el codo se halle al nivel de las teclas negras.

El *cuerpo* deberá tener una posición natural, sin afectación alguna, y los pies se tendrán apoyados en el suelo ó encima de una banqueta, pero cerca cada uno del *pedal* que le corresponde. La muñeca formará línea recta con el antebrazo y la mano; y ésta quedará ligeramente arqueada é inclinada un poco hácia el dedo pulgar, de modo que éste pueda pasar libremente por debajo de la mano sin que ésta sufra movimiento alguno y por tanto sin que los dedos se muevan de la posición en que estén.

Al dedo pulgar se le designa con el número 1; al índice con el 2, al de corazón con el 3, al anular con el 4, y al meñique con el 5.

Debe evitarse cuidadosamente desde el primer momento tocar las teclas con las uñas, ni estirar ni doblar los dedos pues estos son graves defectos difíciles de corregir. El dedo pulgar no debe salirse del teclado.

Movimiento de los dedos

Deberán levantarse los dedos con rapidez sin que la mano haga movimiento alguno, dejándolos caer sobre las teclas á modo de martillo.

Del ligado

Esta es una de las partes más importantes del mecanismo y consiste en no levantar el dedo de la tecla que haya bajado hasta que otro dedo hicra ó pise otra tecla á fin de que los sonidos se enlacen entre sí.

Del staccato

Este se obtiene atacando la tecla y levantando el dedo rápidamente.

Del picado ligado

Se hace apoyando el dedo sobre la tecla, y levantándolo enseguida pero no tan de prisa como en el staccato.

Ejercicios de cinco notas en posición fija

Los dedos colocados sobre las notas *redondas* no deben abandonar las teclas hasta la terminación de cada ejercicio.

1 Repitase varias veces cada compás.

No separar el dedo pulgar del teclado. Cuando no haya de tocar deberá permanecer quieto rozando las teclas.

Ejercicios en posición libre

Estos ejercicios deben tocarse de un modo ligado y con igualdad de fuerza; al principio se ejecutarán lentamente, debiendo repetirlos muchas veces.

4 La nota sobre la que esté escrito el signo $\wedge$ deberá acentuarse después de haber ejecutado varias veces el ejercicio. La mano izquierda tocará dos octavas más bajas.
