INTRODUCTION

Jacob Bernhard Struve (born in Stockholm 1767, died in Stockholm 1826) was the child of a pharmacist of German descent, Frans Ulrik Struve. Jacob Struve became a student at the Uppsala University in 1779 and graduated with botanical dissertations in 1785 and 1788. Struve turned to music professionally only in the 1790's. He was made a member of the Royal Swedish Academy of Music in 1797. He was active as a performer and teacher of piano and organ, as well as a composer. His name is sometimes rendered as *Struwe*.

Struve wrote comic operas, other vocal works including a *requiem* setting, several piano works, and chamber music. The bulk of the chamber music is for strings, including five quartets and two quintets. Comprehensive summaries of what is currently known about Struve's life and works are given in Haglund (1997) and Lundberg (2015).

Partbooks containing Struve's five string quartets have been preserved. In these partbooks, the D minor quartet appears first. The quartet is not numbered, but the second quartet to appear in the same partbooks is consistently called "No 1 in G". On the front covers of the partbooks, one reads "Harmoniska sällskapet", indicating that the parts have belonged to the Harmoniska sällskapet ("Harmonic Society") in Stockholm, founded in 1820, where Struve is known to have been an active member. It is believed that many of Struve's chamber music compositions were intended for performance in the Harmoniska sällskapet (Lundberg, 2015). This would suggest a late date of composition in the range 1820–1826. The D minor quartet, however, is dedicated "to the amateurs of Nor[r]köping". Struve was organist in the German Church in Norrköping during 1810–1817, and one could therefore imagine that the quartet was composed during that period. Another possibility would be that Struve composed the quartet later and dedicated it to friends he had made during his earlier Norrköping period. There was an active Musikaliska sällskapet ("Musical Society") of amateur musicians in Norrköping during Struve's tenure as organist, but this society was disbanded in 1817 and did not recover until 1828 (Haglund, 1997:25). In view of this, an 1810–1817 composition date is the most plausible, since it is likely that Struve dedicated the quartet to the Norrköping musicians in the hope of actually having it performed. Unfortunately, nothing is currently known about contemporary performances of the D minor quartet (nor of any other chamber music works by Struve). The preserved parts contain numerous errors, the most glaring of which is the omission of 16 bars in the 4th movement of the violoncello part. The presence of uncorrected errors and omissions makes it unlikely that the preserved parts of this quartet have been used in actual performance. If parts from actual performances were preserved in Norrköping, they may have been destroyed in a 1943 fire in the archives of the Musikaliska sällskapet.

EDITORIAL PROCEDURES

The only source for the D minor string quartet are hand-written parts bound in part-books that are preserved in the Musik- och Teaterbiblioteket (State Music and Theatre Library), Stockholm, siglum Z/Sv. They are believed to be autographs. This source is referred to below as MS (“manuscript”). On the title page of the first violin part, one reads the following: *Quatuor. / pour. / deux Violons Alto et Violoncelle. / composé et dédié / aux / Amateurs de Norköping / par / Jacob B. Struve*. At the bottom of the page is stated in the same handwriting: *in D. Minor*. There are no title pages for the other parts.

The MS handwriting is mostly easy to read. At some points, music has been crossed out with ink, and there are also some examples of corrected staves on strips of paper (also in ink) glued onto the sheet. In general, such corrections have not substantially decreased the readability. Presumably, all corrections in ink have been made by the copyist (composer) himself. In the first violin part, there are a few examples of corrections and annotations done with pencil. Many errors, however, have not been corrected, neither in ink nor by pencil, as is apparent from the critical commentary, below.

As for keys, tempo indications, bar lines, multibar rests, beaming, and ties, MS presents few challenges. Accidentals are sometimes wrong or missing in MS, but their emendations have been rather straightforward.

The editing of articulation (including slurs) and dynamics is, generally speaking, another matter. There are often differences between the parts with respect to these features, and also between similar sections within the same part. The principle, of course, has been one of consistency, which means, for example, that articulations have been copied from one part to another where this has appeared to be musically sensible. In some cases, however, it has been difficult to tell what is preferred by the composer. One example concerns dynamical markups such as *sf*: when there is an *sf* indication in one part only, it often seems reasonable to copy it to the other parts. But this is not a foolproof method, because the articulations and/or tone durations may differ between parts to such an effect that it would make sense to have an *sf* in one part only. Sometimes, MS is inconsistent to such a degree that it has not been possible to infer what the composer wished, if indeed he wished similar passages to be played identically. In a few places, then, such inconsistencies have been left untouched. An example is having or not having slurs between the two first eighth-notes in Mvmnt 4, bars 15, 223, 233, etc.

Editorial additions are typographically differentiated from articulation and dynamics found in MS by being bracketed (dynamics), parenthesized (staccato dots), or dashed (slurs). It is the intention that this edition will provide a near-minimum level of articulation and dynamics that can be derived directly from MS, according to the present editor. Naturally, there are more places where it would make musical sense to introduce articulation marks or dynamical indications.

CRITICAL COMMENTARY

Remarks in the format “*cf.* b. 5” are to be interpreted thus: ‘a comparison with bar 5 will provide an argument for the editorial change made’. In each case, the reference is intended to be made to a location that is maximally similar to the one under consideration. Occasionally, this means that the location referred to may have been editorially emended as well. By consulting the commentary for *that* bar, the reader will eventually end up in a place where the feature of interest is actually found in MS.

Violins I and II, Viola, and Cello, measures 23 to 32. The score is in 3/4 time, key of B-flat major, and features a crescendo leading to a fortissimo (ff) dynamic. The Violin I part has a melodic line with many accidentals, while the other parts provide harmonic support.

Violins I and II, Viola, and Cello. Measures 35-42. The score shows a complex rhythmic and melodic development. Measures 35-36 feature a series of eighth and sixteenth notes in the strings. Measures 37-38 show a shift in texture with more sustained notes and a crescendo leading to a fortissimo (sf) dynamic in measures 39-40. Measures 41-42 continue the melodic lines with various articulations and dynamics.
